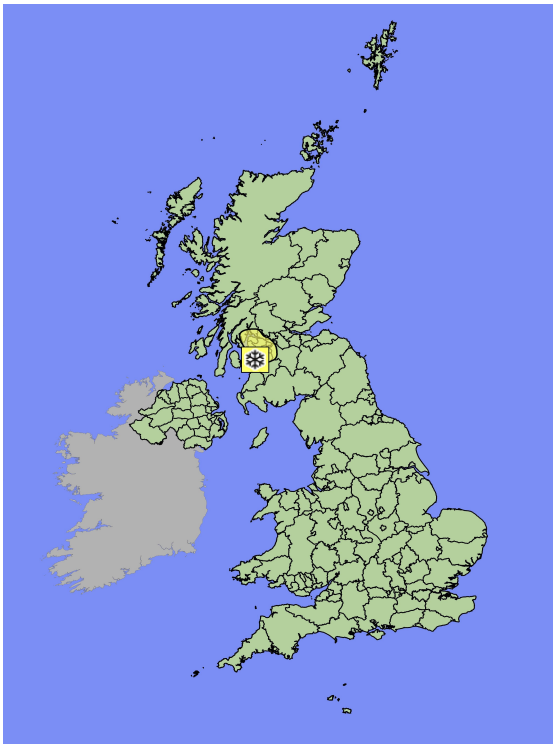
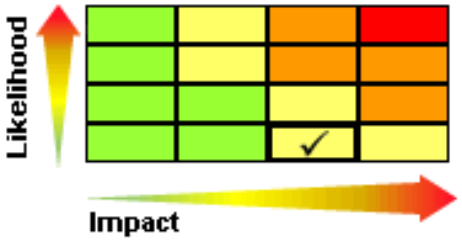
National Severe Weather Warning Service





Chief Forecasters Assessment
A front will move northwards from Northern Ireland into western Scotland during the first part of Thursday. Rain will readily turn to snow as it comes inland across southwest Scotland. As yet there remains considerable uncertainty regarding the eastward extent of the snow and its intensity and so the public are advised to monitor the website for possible updates to this warning.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **00:05 on Thu, 13th Dec 2012** until **10:00 on Thu, 13th Dec 2012**

An area of snow is expected to move northwards across the southwest of Scotland during the early hours of Thursday and to clear away later on Thursday morning. It could give slushy deposits of around 1 to 2 cm on the lower routes with up to 5 cm of snow possible over the higher routes. Some ice is possible as well.

The public are advised to take extra care.
